

SpeedPlate Kit 5 Finger

Product Images

Short Description

Centering tool for 5 hole rims

The SpeedPlate is a tool specifically designed for balancing car tires. It makes balancing easier and more accurate.

The tool fits many different types of wheels and works with most 40mm shaft balancing machines.

Advantages of the SpeedPlate:

Robust and durable: The tool is virtually indestructible.

Versatile: Fits many different wheel sizes and types.

Efficient: Minimizes balancing problems and reduces returns.

Precise: Ensures accurate wheel balance.

Extensive accessories: Includes various centering tips for optimal fit.

Suitable for 5-lug wheels of cars, SUVs, and light trucks with a bolt circle diameter (PCD) between 95.25 mm and 180 mm.

The SpeedPlate comes with 5 long ball seat cones, 5 short ball seat cones, and 5 short cone seat cones.
